Global Satellite Telecommunications

 The top half of the page features a silhouette of a person wearing a helmet and carrying a large backpack, likely a soldier or a field worker. The person is positioned on the right side of the frame, looking towards the left. The background is a soft, hazy sky with some bare tree branches visible on the left side. The overall tone is somber and professional.

Preparedness & Public Safety

When a disaster strikes (terrorism attack, earthquake or any emergency crisis), public institutions need to deploy quickly and efficiently emergency teams and effort on the field to ensure civilian safety. During these crises, conventional networks are usually saturated or discontinued. Satellite solutions are the only and most reliable way to maintain communications at anytime and anywhere.

Public institutions staff can highly benefit from satellite phones, portable modems or quick-deploy VSAT solutions to get voice and/or data connectivity and ensure first response is adequately deployed and coordinated.

Deploy long-lasting and robust solutions

All our phones, accessories, modems and VSAT antennas are designed to provide instant communications and to remain operational even in the most inhospitable locations: extreme heat or cold, ice or sand storm, humidity, etc...

Welfare and diplomatic services

Our satellite-based solutions support diplomatic staff during their missions providing a secured way to stay connected with their friends and family in any situation and location. Many of our solutions also provide GPS location features, so that your workforce can be localizable easily and get assistance if needed.

Deploy effective communication network to enhance local public services

Elections

Enhance local or national voting results collection thanks to a secured and guaranteed data connection and ensure accurate and fast communication to the public

Health & Telemedicine

Provide operating medical staff with easy to use and quickly deployable voice and video systems and accelerate diagnostics process or medical aid coordination.

Security

Bring easy telecommunications solutions to police or border control patrols to ensure instant report of any incident at any time
